MOMS Clinic

Moms Over Medicine

“Moms Over Medicine” aims to improve the partnerships between the Banner – University Medical Center OB services, community Medication-Assisted Treatment clinics, sobriety support networks and the Family-Centered Neonatal Abstinence Syndrome program at the Banner – University Medical Center NICU.

During your prenatal care you will be cared for by a team of compassionate physicians, nurses, medical assistants and social workers who work as a team and embrace a Patient-Centered approach to care.

Our goal is to support our patients throughout pregnancy, connecting women with key resources and support services that yield optimal outcomes for mother and baby.

Key points about the MOMS clinic

- Receive guidance and support to maintain a healthy pregnancy
- Learn about symptoms of NAS
- Benefit from both Individualized prenatal care and group support
- Engage in community sobriety support
- Learn about positive coping techniques
- Unite with other Moms
- Connect and Collaborate with NICU services at Banner – University Medical Center
